Added Ultrafast mode for GPT-6.1 Sol in the Responses API.

From: OpenAI Platform

Source: OpenAI Platform

The Brief

****What shipped****

OpenAI shipped the Ultrafast mode for the gpt-6.1-sol model in the Responses API.

****Capabilities****

The Ultrafast mode reduces the time between generated output tokens, enhancing response speed. Specific speed improvements or benchmark numbers are not stated.

****Availability****

The Ultrafast mode is available to all API users with service_tier set to 'ultrafast', subject to rate limits. Pricing details for Ultrafast mode are not stated.

****Why it matters****

This feature allows developers to optimize for lower latency in applications that require rapid responses, potentially improving user experience in real-time applications.

****Caveats****

Details on the exact performance improvements and any limitations of the Ultrafast mode are not provided, which may affect expectations.

Full Announcement Details

OpenAI shipped the Ultrafast mode for the gpt-6.1-sol model in the Responses API. The Ultrafast mode reduces the time between generated output tokens, enhancing response speed. Specific speed improvements or benchmark numbers are not stated.
