Released the Decisions API in beta with gpt-6-luna.

From: OpenAI Platform

Source: OpenAI Platform

The Brief

****What shipped****

OpenAI released the Decisions API in beta with the gpt-6-luna model.

****Capabilities****

The Decisions API can process text and images to generate typed answers, claiming to do so 10 times faster than the Responses API. Specifics on context length, benchmark numbers, or quality metrics are not provided.

****Availability****

The Decisions API is available in beta through the OpenAI Platform. Pricing and tier details are not stated.

****Why it matters****

This API allows for faster response generation, which could improve the efficiency of applications that rely on real-time decision-making. Developers may need to consider integrating this API to enhance performance compared to previous models.

****Caveats****

The announcement does not provide detailed performance metrics or benchmarks to verify the speed claims. Access is currently limited to the beta phase, and further details on capabilities may be forthcoming.

Full Announcement Details

OpenAI released the Decisions API in beta with the gpt-6-luna model. The Decisions API can process text and images to generate typed answers, claiming to do so 10 times faster than the Responses API. Specifics on context length, benchmark numbers, or quality metrics are not provided.
