

StreetComplete on iOS is now in public beta

From: Hacker News

Source: Hacker News

The Brief

****What shipped****

StreetComplete on iOS is now in public beta.

****Capabilities****

StreetComplete is an app that allows users to contribute to OpenStreetMap by answering simple questions about their surroundings. It enables users to add information to the map, enhancing its detail and accuracy.

****Availability****

The app is available for download on iOS in public beta. Pricing details are not stated.

****Why it matters****

This release allows iOS users to actively participate in improving OpenStreetMap data, potentially increasing the quality and quantity of map information available globally.

****Caveats****

As a public beta, there may be bugs or incomplete features, and the performance may not be fully optimized. Specific user feedback and data on the app's effectiveness have not been provided.

Full Announcement Details

StreetComplete on iOS is now in public beta. StreetComplete is an app that allows users to contribute to OpenStreetMap by answering simple questions about their surroundings. It enables users to add information to the map, enhancing its detail and accuracy.
