

Rally Up: 'Gears of War: E-Day' Launches on GeForce NOW

From: NVIDIA

Source: NVIDIA

The Brief

****What shipped****

Gears of War: E-Day launched on GeForce NOW on October 6, 2023.

****Capabilities****

The game features GeForce RTX 5080-class performance in the cloud, utilizing NVIDIA DLSS and NVIDIA Reflex technologies. It supports various gameplay modes including campaign, cooperative, and competitive.

****Availability****

Gears of War: E-Day is available on GeForce NOW for members, with a day pass option for new users. Membership details and pricing are not specified.

****Why it matters****

This launch allows developers to integrate high-performance gaming experiences into their applications without requiring users to have powerful local hardware, potentially expanding the user base for cloud gaming solutions.

****Caveats****

Availability of games on GeForce NOW may vary, as they are onboarded after release. Specific pricing for memberships and day passes is not provided.
