llama.cpp v0.4.1 released

From: GitHub

Source: GitHub

The Brief

****What shipped****

llama.cpp version 0.4.1 was released by the llama.cpp project.

****Capabilities****

This version adds support for the Maple 20B-A1B, Tencent Hy 4, and Spark2.5 models. It also improves JSON schema handling, chat parsing, logging, server child-process management, and updates ggml to version 0.24.0.

****Availability****

The release is available on GitHub. Pricing and tiers are not stated.

****Why it matters****

The addition of support for new models enhances the versatility of the llama.cpp framework, potentially enabling users to leverage more advanced capabilities in their applications.

****Caveats****

Specific performance benchmarks, context lengths, or detailed capabilities of the newly supported models are not provided in the description.

Full Announcement Details

llama.cpp version 0.4.1 was released by the llama.cpp project. This version adds support for the Maple 20B-A1B, Tencent Hy 4, and Spark2.5 models. It also improves JSON schema handling, chat parsing, logging, server child-process management, and updates ggml to version 0.24.0.
