

Perplexity Portable Computer Is Now Available on Windows, Powered by NVIDIA RTX

From: NVIDIA

Source: NVIDIA

The Brief

****What shipped****

Perplexity Portable Computer, a local version of the Perplexity Computer agent, is now available on Windows powered by NVIDIA RTX GPUs.

****Capabilities****

The Perplexity Portable Computer can handle multistep tasks and analyze data using local models, which helps maintain the sensitivity of information on the device. Specific capabilities, such as context length, benchmark numbers, speed, or quality claims, are not detailed in the description.

****Availability****

The product is available on Windows, but specific pricing, tiers, or regions are not stated.

****Why it matters****

This release allows users to execute AI tasks locally, potentially improving data privacy and reducing reliance on cloud services for AI processing.

****Caveats****

The announcement does not provide specific metrics or benchmarks to verify the claims made about the performance of the Portable Computer.
