Released GPT-6.1 Terra, a fast, efficient model for visual reasoning, precise computer use, and clear, natural writing.

Source: OpenAI Platform

The Brief

What shipped
OpenAI released GPT-6.1 Terra, a model described as designed for visual reasoning, computer use, and natural writing.

Capabilities
OpenAI claims it is fast and efficient and supports visual reasoning, precise computer use, and clear, natural writing. The announcement provides no modality details, context length, benchmark results, or speed and quality figures.

Availability
The change lists gpt-6.1-terra and the v1/responses and v1/chat/completions APIs. Pricing, access requirements, availability status, and regional availability are not stated.

Why it matters
Builders can evaluate GPT-6.1 Terra for visual reasoning and computer-use workflows, as well as writing tasks. The announcement gives no performance or cost data to determine whether it improves on an existing model choice.

Caveats
The capability and efficiency claims are not accompanied by benchmarks or implementation details. OpenAI points to the GPT-6 guide for prompting and migration guidance, but the provided text does not include that guidance.
