python-genai v2.24.0 released

From: GitHub

Source: GitHub

The Brief

****What shipped****

python-genai v2.24.0 was released by Google Cloud.

****Capabilities****

This release adds credential APIs resource to GAOS and introduces new components such as RetrievalCallStep and RetrievalResultStep to the interactions schema and SDKs. Additionally, it implements file upload and download functionalities across Python.

****Availability****

The release is available on GitHub for download. Specific pricing and tier details are not stated.

****Why it matters****

This update enhances the functionality of the SDKs, allowing for improved interaction capabilities and file management, which can facilitate better integration and usage for developers.

****Caveats****

The release notes do not provide benchmark numbers, performance metrics, or any claims regarding speed or quality, leaving some details unverified.
