python-genai v2.28.0 released

From: GitHub

Source: GitHub

The Brief

****What shipped****

Version 2.28.0 of python-genai released, adding support for models lyria-3.5, gemini-omni-1.1-flash, and gemini-omni-flash-preview in the Interactions Model enum.

****Capabilities****

This release includes support for continuation_token in Interactions, enhancing the ability to manage state across multiple interactions. Specific performance metrics and benchmark numbers are not provided.

****Availability****

The release is available on GitHub as an update to the python-genai library. Specific pricing or access details are not stated.

****Why it matters****

The addition of new models and the continuation_token feature may improve interaction handling and model integration in production systems, allowing for more robust state management.

****Caveats****

No specific performance benchmarks or detailed capabilities of the newly added models are provided, which may require further evaluation before integration.
