

Announcing our \$160M grant from Coefficient Giving

By: AI Alignment Forum

Source: AI Alignment Forum

What's New

****Claim****

Resolution has received a \$160M grant from Coefficient Giving to enhance alignment research.

****Evidence****

The grant consists of a \$108M base amount and an additional \$52M contingent on hiring and compute goals. The announcement does not provide specific metrics on expected outcomes or performance indicators related to alignment research.

****Method****

The funding will be allocated to rigorous alignment research aiming to either improve confidence in alignment strategies or identify challenges in achieving alignment. Specific methodologies for research execution are not detailed in the announcement.

****Limitations****

The announcement lacks empirical data or prior results to substantiate the efficacy of the proposed research initiatives. There is also uncertainty regarding how hiring success and compute needs will be defined and measured.

****Safety relevance****

The grant aims to elevate the profile of alignment research in relation to frontier AI labs, potentially impacting the landscape of alignment strategies and governance.
