openai-python v3.18.0 released

From: GitHub

Source: GitHub

The Brief

****What shipped****

OpenAI released version 3.18.0 of the openai-python library, adding GPT-6 Sol and Luna model identifiers.

****Capabilities****

The inclusion of GPT-6 Sol and Luna model identifiers suggests these models may offer enhanced capabilities, but specific performance metrics, context lengths, or benchmark numbers are not provided in the release notes.

****Availability****

The new version is available via the GitHub repository for the openai-python library. Pricing and specific tiers are not stated.

****Why it matters****

The addition of GPT-6 model identifiers potentially expands the functionality for developers integrating these models into their applications, indicating new capabilities may be accessible.

****Caveats****

No specific details about the performance or characteristics of the GPT-6 models are provided, and claims regarding their capabilities are unverified at this stage.

Full Announcement Details

OpenAI released version 3.18.0 of the openai-python library, adding GPT-6 Sol and Luna model identifiers. The inclusion of GPT-6 Sol and Luna model identifiers suggests these models may offer enhanced capabilities, but specific performance metrics, context lengths, or benchmark numbers are not provided in the release notes.
